

# GUIDELINES FOR HAVING A SAFE VISIT

By following these guidelines, you can keep your loved one and our Good Samaritan Society family safe during your visit.

## Get vaccinated

- Schedule an appointment or get registered for an appointment to receive your vaccination.
- Vaccinated people have fewer restrictions than unvaccinated people. See CDC website for specific recommendations.
- Visitors and residents are not required to disclose vaccination status.

## Wear a mask and practice social distancing

- Wear a face mask that covers your mouth and nose when you are around staff, other residents or a loved one whose vaccination status is unknown.
- Because people can spread the virus without feeling sick, face masks protect others in case you have COVID-19.
- Maintain a distance of at least six feet when you are around staff, other residents or a loved one whose vaccination status is unknown.
- If both are fully vaccinated, a visitor and resident may visit without masks or distancing if alone in the resident's room or a designated visitation area. If the visitor is not vaccinated, they can visit a fully vaccinated resident alone in the resident's room or a designated visitation area without distancing while wearing a well-fitting mask.

## Practice hand hygiene

- Wash or sanitize your hands frequently, especially before leaving and when you return.
- Avoid touching your eyes, nose and mouth.

## Self-monitor for symptoms

- Contact us if you develop any symptoms or if you test positive for COVID-19 within 14 days of your visit.
